

DAKER DK PLUS

On-line double conversion UPS (rack/tower) - single phase and three phase VFI

3 101 74

3 101 77

3 106 64

The main parameters of the UPS, including the battery charge level and faults, are displayed on the LCD screen on the front panel. The integrated communication software not only controls the UPS and its switch-off if there is a malfunction, and enables the user to test the main functions remotely, communicate via SNMP/Internet/network adaptor and access the functions of the UPS via the Internet, but can also send the user an SMS if specific events occur. The internal extension connector enables a WEB/SNMP card or a relay interface to be installed which provides insulated contacts for applications on industrial control panels or remote alarm panels.

If there is an electronic fault, overload, overheating or for scheduled maintenance operations, the automatic or manual (optional) bypass ensures continuity of the power supply for critical loads. A bypass switch is available for maintenance

Pack	Cat.Nos	Convertible	e UPS with	batteries						
		Single phas Nominal power (VA)	Active power (W)	Backup time (min)	Weight (kg)					
1 1 1	3 101 70 3 101 71	1000 2000	900 1800	9 10	16 29.5					
1 1 1	3 101 72 3 101 73 3 101 74	3000 5000 6000	2700 5000 6000	7 6 5	30 60 60					
		Convertibl	e UPS with	out batterie	S					
		Single phas Nominal power (VA)	Phase configuration	Weight (kg)
